

## “Beyond the Basic - Beekeeping for Improvers”

Although the basics of beekeeping are not difficult to pick up, once newer beekeepers have kept a couple of colonies for a few years, it becomes apparent that there is more to this than the basics! These next series of courses examine some of the key aspects of becoming a better beekeeper. They are intended for two groups of beekeeper:

- The primary target audience - newer beekeepers with at least 2 years experience and/or “The Basic”
- Potential tutors for this programme\*

Both courses **‘Beekeeping for Improvers’** were very successful, as they were both fully booked. So bookings for the next 3 courses in the series are now being taken on the web site:
